FREE ACTIVITY PACK

Katherine Johnson

The Girl Who Counted Her Way Forward

Inside this pack

1. Words to know — a picture-book glossary
2. Be a curious scientist — four things to try with a grown-up
3. My big question — write and draw your own question

These pages come from the back of the book. Print them at home or in class and enjoy them together.

Words to Know

Mathematician: someone who solves problems using numbers and shapes.

Calculate: to work out an answer with numbers.

Computer: once, a person who did calculations; now, also a machine.

Astronaut: a person who travels into space.

Orbit: to travel round and round a planet.

Spacecraft: a vehicle that travels in space.

Path: the way something travels from one place to another.

Medal: a special prize you can wear.

Be a curious scientist

Try these with a grown-up:

1. Count your day. Count your steps from your bed to the front door. Count again tomorrow. Did you get the same number?

2. Fair shares. Share 12 crayons between 3 people. Check that everyone has the same.

3. Rocket path. Throw a soft ball into a basket from close up, then further away. How do you have to change your throw?

4. Check it! Ask a grown-up to add up three numbers. Then you check with counters or blocks.

My big question

My name is _____

Today I counted _____

I got _____

When I checked, I got _____

Draw what you counted:
