Tarkasa TALES

FREE ACTIVITY PACK

Albert Einstein

The Boy Who Kept Wondering

Inside this pack

1. Words to know — a picture-book glossary
2. Be a curious scientist — four things to try with a grown-up
3. My big question — write and draw your own question

These pages come from the back of the book. Print them at home or in class and enjoy them together.

Words to Know

Compass: a tool with a needle that always points north.

Magnet: something that pulls on iron without touching it.

Imagine: to picture something in your mind.

Patent office: a place that checks ideas for new inventions.

Energy: what makes things move, glow or warm up.

Light: what lets us see. Albert found it travels in tiny packets.

Eclipse: when the Moon passes in front of the Sun and the sky goes dark.

Nobel Prize: a famous prize for big discoveries.

Be a curious scientist

Try these with a grown-up:

1. Make a compass. Stroke a sewing needle 20 times in one direction with a magnet. Lay it on a small leaf floating in a bowl of water. Which way does it turn? (A grown-up handles the needle.)

2. Magnet hunt. Which things in your kitchen does a fridge magnet stick to? Guess first, then test.

3. Bend light. Put a pencil in a clear glass of water. Look from the side. What happened to the pencil?

4. Imagine and draw. If you could ride on a sunbeam, where would you go? Draw your journey.

My big question

My name is

I wonder

I imagine

How could I check?

Draw your idea here:
