FREE ACTIVITY PACK

Marie Curie

A Little Girl with Big Questions

Inside this pack

1. Words to know — a picture-book glossary
2. Be a curious scientist — four things to try with a grown-up
3. My big question — write and draw your own question

These pages come from the back of the book. Print them at home or in class and enjoy them together.

Words to Know

Scientist: someone who asks questions and tests ideas to find out how the world works.

University: a big school for grown-ups.

Invisible: something you can't see.

Rays: energy that travels out from something, like light or warmth from the sun.

Element: one of the building blocks that everything is made of.

Radium: an element that Marie and Pierre discovered. It glows faintly.

X-ray: a special picture that shows the bones inside your body.

Nobel Prize: a famous prize for big discoveries.

Be a curious scientist

Try these with a grown-up:

1. Grow a seed in a jar. Put a bean on wet paper towel against the side of a jar. Look every day. What happens first?

2. Trace a shadow. Chalk around a shadow in the morning and again at lunchtime. Did it move? Why?

3. Look closely. Use a magnifying glass on a leaf, a stone and your fingertip. Draw what you see.

4. Float or sink? Guess first, then test: a spoon, an apple, a crayon, a cork.

My big question

My name is

My big question is

How could I find out?

Draw your idea here:
