Tarkasa TALES

FREE ACTIVITY PACK

George Washington Carver

The Boy Who Helped Plants Grow

Inside this pack

1. Words to know — a picture-book glossary
2. Be a curious scientist — four things to try with a grown-up
3. My big question — write and draw your own question

These pages come from the back of the book. Print them at home or in class and enjoy them together.

Words to Know

Agriculture: growing crops and raising animals.

Soil: the earth that plants grow in.

Crop: a plant grown by farmers, like cotton or peanuts.

Crop rotation: growing different crops in a field in different years.

Nutrients: the good things plants need from soil to grow.

Laboratory: a room where scientists do experiments.

Peanut: a seed that grows underground in a shell.

Wagon: a cart with wheels, pulled by horses.

Be a curious scientist

Try these with a grown-up:

1. Plant Doctor. Grow two bean plants. Give one water and keep one dry. What happens after a week?

2. Soil detective. With a grown-up, look at soil with a magnifying glass. What can you find?

3. Sun or shade? Put one plant in a sunny spot and one in a shady spot. Draw them each week.

4. Share it. Draw a poster showing a friend how to look after a plant.
